

PROFILE	Computer science senior with production software engineering experience from Quindar. Delivered 40 pull requests across test automation, CI reliability, and performance monitoring. Also builds full-stack applications with Python, JavaScript, React, and PostgreSQL. Seeking 2027 new-grad software engineering roles.		
EXPERIENCE	Software Engineering Intern	Summer 2026	
	Quindar · Hybrid - Delivered 40 pull requests that improved automated coverage, CI reliability, and performance monitoring for a spacecraft operations platform. - Expanded end-to-end test coverage across five product workflows and investigated recurring test failures. - Improved daily performance reports and documented a roadmap for continued reliability and telemetry work.		
	Tech Consultant	Aug 2023 - Present	
	Target · Westminster, CO - Provide technical product support and troubleshooting while translating customer needs into clear recommendations. - Train and mentor new employees on procedures, systems, and product knowledge.		
PROJECTS	Spacecraft Simulator	Python · FastAPI · React · CesiumJS	GitHub ↗
	- Derived and implemented two-body Keplerian mechanics for circular, inclined, and elliptical orbits using Kepler's equation. - Built APIs and an interactive 3D globe for orbit sampling, ground-station visibility, and contact-window scheduling; deployed the stack as one service.		
	ARC	Node.js · Express · PostgreSQL · OpenAI API	GitHub ↗
	Built a personal-growth application that generates real-world quests with persistent profiles, progression, streaks, and dynamic difficulty.		
	Powerwash	Python · Flask · Pandas	GitHub ↗
	Collaborated on a data-cleaning platform with upload APIs, missing-value handling, normalization, validation, and visualization.		
EDUCATION	University of Colorado Boulder B.S. Computer Science		May 2027
	GPA: 3.48/4.00 · Horace M. Hale Scholarship recipient		
	Coursework: Algorithms, Data Structures, Computer Systems, Cybersecurity, Software Development		
SKILLS	Languages	Python, JavaScript, Java, C++, C#, SQL, Scala	
	Web	FastAPI, React, Express, Flask, Node.js, REST APIs, OAuth	
	Tools & data	PostgreSQL, Git, GitHub, Linux, Docker, Postman, Wireshark, Render, CesiumJS	
	Engineering	End-to-end testing, test automation, CI/CD, debugging, performance monitoring, code review, Agile
