

Abiral Tuladhar

Software Engineer | Computer Science Senior

abiraltuladhar22@gmail.com | (720) 919-0209 | Westminster, CO | abiraltuladhar.dev | github.com/AbiralTr

PROFESSIONAL SUMMARY

Computer science senior with production software engineering experience in aerospace. Experience across test automation, CI reliability, performance monitoring, and full-stack development with Python, JavaScript, React, and PostgreSQL. Seeking 2027 new-grad software engineering roles.

EXPERIENCE

Software Engineering Intern — Quindar, Hybrid Summer 2026

- Delivered 40 pull requests improving automated coverage, CI reliability, and performance monitoring for a spacecraft operations platform.
- Expanded end-to-end test coverage across five product workflows and diagnosed and resolved recurring test and CI failures.
- Improved daily performance monitoring and reporting, identified telemetry gaps, and developed a roadmap for continued reliability improvements.

Tech Consultant — Target, Westminster, CO Aug 2023 – Present

- Provide technical product support and troubleshooting while translating customer needs into clear recommendations.
- Train and mentor new employees on procedures, systems, and product knowledge.

PROJECTS

Spacecraft Simulator Python | FastAPI | React | CesiumJS [GitHub](#)

- Derived and implemented two-body Keplerian mechanics for circular, inclined, and elliptical orbits using Kepler's equation.
- Built APIs and an interactive 3D globe for orbit sampling, ground-station visibility, and contact-window scheduling; deployed the stack as one service.

ARC Node.js | Express | PostgreSQL | OpenAI API [GitHub](#)

- Built a personal-growth application that generates real-world quests with persistent profiles, progression, streaks, and dynamic difficulty.

Powerwash Python | Flask | Pandas [GitHub](#)

- Collaborated on a data-cleaning platform with upload APIs, missing-value handling, normalization, validation, and visualization.

EDUCATION

University of Colorado Boulder — B.S. Computer Science May 2027

GPA: 3.48/4.00 | Horace M. Hale Scholarship recipient

Relevant Coursework: Algorithms, Data Structures, Computer Systems, Cybersecurity, Software Development

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++, C#, SQL, Scala

Frameworks & Web: FastAPI, React, Express, Flask, Node.js, REST APIs, OAuth

Testing & Engineering: Playwright, pytest, end-to-end testing, test automation, CI/CD, debugging, performance monitoring, code review

Tools & Data: PostgreSQL, Git, GitHub, Linux, Docker, AWS, Postman, Wireshark, CesiumJS
